2022

While our design philosophy pays respect to the Finnish design's classic principles of timeless simplicity and functionality, the defining characteristic for Poiat are its lasting human-centric spaces and furniture, where aesthetics are the source of satisfaction and well-being.

'In all of our work, the goal is always to capture an enduring ambience that has elegance and some modern quaintness. The best creations are based on a profound interest in the details and a strong commitment to one's vision.'

# Unio

The Unio Collection, an armchair and sofas, opens up a new chapter for Poiat Studio, focusing on new furniture forms and textures. It offers a view of the new and upcoming while at the same time acknowledging the past decades' influences and nostalgia.

The collection consists of three different sizes: a two and a three-seater sofa and a single-seater armchair. The single-seater armchair can be acquired with a swivel mechanism that allows the product to rotate and revert to its original position.

The selection of upholstery fabrics for the Unio Collection is a carefully curated selection of fine fabrics from the industry's most esteemed manufacturers, such as Dedar, Pierre Frey and Larsen. Both the armchair and the sofas are manufactured in Tartu, Estonia.

# Poeme

The Poeme Collection complements Poiat Studio's furniture line that forms a unified space with its designs. Graceful and poetic, yet robust, the Poeme Shelf comes in four different size options. The shelves embrace the refined design of the wooden panels and skilled material usage, which is polished into the finest details.

Taking its name from the French word *Poème*, meaning a poem, the design process was inspired by rounded, old wooden Finnish tools and Japanese architecture.

Featuring a modular and minimal design, the Poeme Shelves are well-suited for both public and private spaces. The pieces from the collection can serve as bookshelves, tv stands or just plainly as a frame for beautiful objects. The free-standing shelves are manufactured of solid oak in Finland and come in three colour variations – Oak, Dark Oak, and Black.

# Bastone

The Bastone Collection, consisting of the Bastone Cabinet, the Bastone Sideboard and the Petit Bastone, is designed by the master cabinet maker and designer Antrei Hartikainen for Poiat Furniture.

Standing at the forefront of art and design, the collection showcases Hartikainen's interest in studying light and shadow and his appreciation of functional craftsmanship in his work.

The creative collaboration with Antrei Hartikainen started in 2017 when Poiat Studio and Hartikainen co-designed Poiat's Fiori Collection. The Bastone Collection intertwines Antrei's master cabinetmaker experience, vision, and aesthetics – bringing out the elements he tries to communicate in his works. All of the pieces in the Bastone Collection are made from solid oak in Finland.

# Fiori

Designed by Poiat Studio in collaboration with the master cabinet maker and designer Antrei Hartikainen, the Fiori Coffee Table Collection epitomises the appreciation of natural materials and the utility of beauty.

The collection is an exclusive realisation of craftsmanship and artistry. Available in three sizes, the smaller tables are designed to slot into the bigger ones, enabling the tables to be used in different interiors and spaces. The two larger tables are available with hand-carved wooden flower objects by Antrei Hartikainen as a special edition. The Fiori Tables are made out of solid oak in Finland.

# Lavitta

Drawing its influence from the traditional rugged Finnish outdoor furniture, the award-winning Lavitta Collection was designed by Poiat Studio as their first furniture collection for Poiat Furniture.

The novel interpretation of the countryside classics creates a fascinating contradiction where rational practicality merges with a sophisticated tactile and visual appeal.

Manufactured in Finland and Estonia, the members of the Lavitta product family are chairs, dining tables, benches and stools. The chairs are made of two pieces of moulded plywood and designed to slot into each other for temporary storage. The lounge chairs, the dining tables, the bench and the stools follow the lines of the chairs with their tapering legs and rounded corners. The base of the tables, the bench and the stools are made entirely of veneered and moulded plywood, without any steel parts.

# Poiat

Established in 2014, Poiat is a furniture company that, besides selling its own collection, designs spaces, concepts and products. The collections include Lavitta, the award-winning design by the founders Timo Mikkonen and Antti Rouhunkoski, and Fiori and Bastone, the results of collaboration with the master cabinet maker and designer Antrei Hartikainen. The home of Poiat is in the village of Fiskars and Ullanlinna neighborhood in Helsinki, Finland.
